10	HDW7058	1	5/16 Nylock Nut

AUGER HOLDER MAIN PLATE

This part of the Auger Holder will come to you as just the holder section.

The mounting kits are sold separately per the unit you are mounting it on. So you must purchase 2 items, the main mount as shown in picture and then the mounting kit to fit your machine.

The rubber strap will connect with the carriage bolt, washer and nut that comes with it going through the square hole in the side of the auger handle mount end. The painted rubber strap hook will install on the other side of the auger handle mounting position with the 5/16 x 3/4 carriage bolt washer and nylock nut.

The J-bolt will go into the center location and is use to secure the ice auger shaft down securely, as shown in picture. It can be mounted in either hole. Use the knob nut, flat washer and Loc washer.
