HDW2051	4	5/16 x 1 Hex Bolt
HDW7058	4	5/16 Nylock Nut
INST1627	1	Instruction Sheet

CAN-AM DEFENDER WINCH MOUNT

NOTE: This winch mount s for smaller winches. The larger 4000# - 4500# winches with 6" bolt pattern will automatically bolt up to the machine. The smaller winches with the 4-7/8" bolt pattern will require this winch mount plate.

First attach winch to winch plate using hardware provided with winch. Depending on winch you may have to place winch mount bolts in place before attaching winch.

After bolting winch to plate now you can attach the winch with plate to the machine with the 5/16 x 1 hex bolts. The winch mount plate will line up with holes in the vertical frame tubes. Use the spacer between the frame tube and the winch mount plate for bolt head clearance on the winch bolts. Place nylock nut on the back side and tighten securely. Bolt pattern in the middle is for the smaller 2 bolt pattern style winches.
