

ITEM	PART#	QTY.	DESCRIPTION
1	1637-1	1	Winch Mount plate

WINCH MOUNT INSTALLATION INSTRUCTIONS
KAWASAKI MULE PRO-MX

NOTE: This machine has a winch mount in the front already but only allows for the smaller winch bolt pattern if you have purchase the Moose winch mount this does allow for the larger winches and attach up higher for better cable alignment to pick up plows.

The winch mount will attach as shown in the picture behind the bumper to the frame tube cross plate just above the stock winch mount. You will have to remove 4 bolts from the frame tube cross plate and align the winch mount up and use the bolts you removed to attach the winch mount. You should attach winch to mount before installation.

The winch will come with mounting hardware and wiring instruction
