

WINCH MOUNT INSTALLATION INSTRUCTIONS
KAWASAKI MULE FX / FXT / FXR / DX

| ITEM | PART# | QTY. | DESCRIPTION |
|------|---------|------|------------------------|
| 1 | 1636-1 | 1 | Main Winch Mount Plate |
| 2 | HDW2102 | 4 | 3/8 x 1-1/4 Hex Bolt |
| 3 | HDW9001 | 4 | 3/8 Flat Washer |
| 4 | HDW7061 | 4 | 3/8 Nylock Nut |

There are two ways to install winch mount behind the front bumper. Between the main to upright tubes there is a panel that can be un-screwed to gain access. **NOTE:** these screws are very hard to remove without stripping them out.

Second way is to just to remove the front bumper completely.

Attach the winch mount to the frame as shown in the picture using the 4 – 3/8 x 1-1/4 bolt, washers and nuts the came with the kit in the bolt bag.

Attach the winch to the mount with hardware provided with the winch along with the fairlead. Cable should come off the bottom of the spool.

Wire the winch according to the winch manufactures instructions.

When completed re-attach the bumper plate or bumper.
